========== 02/11, Sprint 2 Planning ==============

Time: 21:15
Team members present:
- Ngũ Kiệt Hùng
- Trình Cao An
- Trần Nguyễn Nhật Cường
- Trần Thanh Long
- Nguyễn Thế Thanh Long

Identified Tasks:
- Project Planning and Vision Document refinement based on stakeholder feedback
- Use-case specification documentation *(12 cases)*
  - Landing Page for Guest Users
  - Registered User Profile Interaction
  - Registered User Profile Management
  - Authentication System
  - News Feed Navigation
  - Registered User Block Posting Procedure
  - Registered User Editing Block Post Procedure
  - Exploration Feed Navigation
  - Registered Users Block Post Interaction
  - Direct Messaging
  - Expert Users specialized functionalities
  - Administration User specialized functionalities
- User interface server implementation and basic layout structure for business data retrieval and view **(Optional but encouraged tasks)**
  - Front-End displaying raw user's profile information
  - Front-End displaying raw post information
- Business-logic server request controllers routing and input interfaces **(Optional but encouraged tasks)**
  - Back-End Business Logic for User Authentication through Google Authentication
  - Back-End Business Logic for user's profile information retrieval and update from/to database
  - Back-End Business Logic for block post information retrieval and update from/to database
- Finalize database schematic

Task Assignments:

- Ngũ Kiệt Hùng
  - Project Planning and Vision Document refinement based on stakeholder feedback
  - *Use-Case Specification:* News Feed Navigation
  - *Use-Case Specification:* Exploration Feed Navigation
- Trần Thanh Long
  - *Use-Case Specification:* Registered User Block Posting Procedure
  - *Use-Case Specification:* Registered User Editing Block Post Procedure
  - *Back-End Implementation:* user's profile information retrieval and update from/to database *(optional)*
  - *Back-End Implementation:* block post information retrieval and update from/to database *(optional)*
- Nguyễn Thế Thanh Long
  - *Use-Case Specification:* Landing Page for Guest Users
  - *Use-Case Specification:* Authentication System
  - *Front-End Implementation:* displaying raw user's profile information *(optional)*
  - *Front-End Implementation:* displaying raw post information *(optional)*
- Trần Nguyễn Nhật Cường
  - *Use-Case Specification:* Expert Users specialized functionalities
  - *Use-Case Specification:* Administration User specialized functionalities
  - *Back-End Implementation:* Finalize database schematic
  - *Use-Case Specification:* Direct Messaging
- Trình Cao An
  - *Use-Case Specification:* Registered User Profile Interaction
  - *Use-Case Specification:* Registered User Profile Management
  - *Use-Case Specification:* Registered Users Block Post Interaction
  - *Back-End Implementation:* User Authentication through Google Authentication *(optional)*

Summary of the meeting: The meeting is primarily conducted to plan out use-case specification tasks allocation, with all available tasks allocated**.** The meeting was originally planned for the previous sprint retrospective based on stakeholder's feedback to improve project planning and visioning. However, the feedback had fallen short, so the development team has decided to tackle auxiliary prototype implementation in order to both familiarize with the underlying technologies and also have mock-up templates for upcoming system architecture design.
