========== 16/11, Sprint 2, Second Week Report ===============
**Time:** 20:32

Team members present:
- Ngũ Kiệt Hùng
- Trình Cao An
- Trần Thanh Long
- Nguyễn Thế Thanh Long
- Trần Nguyễn Nhật Cường

Team members absent: None

JIRA status:

Status reports:
- Ngũ Kiệt Hùng
  - Completed tasks
    - *Use-Case Specification:* News Feed Navigation finished.
    - *Use-Case Specification:* Exploration Feed Navigation finished.
  - To-do tasks
    - Planning for PA3.
    - Preliminary Version implementation planning.
- Trình Cao An
  - Completed tasks
    - All primary tasks have been completed in the previous week.
  - To-do tasks
    - Continue preliminary version prototyping.
    - Preview PA3.
  - Issues/Obstacles
    - Not everyone is already completed in their tasks, resulting in wasted waiting time.
- Trần Thanh Long
  - Completed tasks
    - *Use-Case Specification:* Registered User Block Posting Procedure finished.
    - *Use-Case Specification:* Registered User Editing Block Post Procedure finished.
  - To-do tasks
    - Oral task: Database Implementation.
    - Preview PA3.
  - Issues/Obstacles
    - Issues with setting up PostgreSQL running environment.
    - PostgreSQL's official example seems to be wrong or outdated, resulting in wasted time.
- Trần Nguyễn Nhật Cường
  - Completed tasks
    - *Use-Case Specification:* Expert Users specialized functionalities finished.
    - *Use-Case Specification:* Administration User specialized functionalities finished.
    - *Use-Case Specification:* Direct Messaging finished.
    - Finalized database schematic.
  - To-do tasks
    - Review all Use Case Specifications documentation of all other members.
    - Continue with User Interface designing (From PA0).

- ■ Preview PA3.
  - ● Nguyễn Thế Thanh Long
    - ○ Completed tasks
      - ■ *Use-Case Specification:* Landing Page for Guest Users finished.
      - ■ *Use-Case Specification:* Authentication System finished.
      - ■ Off-time collaboration with Cường to come up with more elegant designs for User Interface.
    - ○ To-do tasks
      - ■ Preview PA3.

Actions: The meeting has concluded that a reasonable performance was met by team members. The resulting deliverables are in acceptable condition, and Hùng will package it for delivery to stakeholders.

Summary of the meeting: The meeting aim is to evaluate the progress in software requirement design of team members; as well as evaluating completion time of each individual. With those targets in mind, the meeting chair has concluded that the evaluation is successful, but not yet outstanding due to not being able to conduct optional implementation tasks.

Status reports:
- Ngũ Kiệt Hùng
  - Completed tasks
    - Project planning and vision refinement based on stakeholder's feedback.
  - To-do tasks
    - *Use-Case Specification:* News Feed Navigation and Diagram.
    - *Use-Case Specification:* Exploration Feed Navigation and Diagram.
  - Issues/Obstacles
    - Deadlines from other courses hinders the process.
    - Issues with Use Case Diagram creation tool.
    - Reviewing feedback from stakeholders based on other groups' submissions.

- Trình Cao An
  - Completed tasks
    - *Use-Case Specification:* Registered User Profile Interaction finished.
    - *Use-Case Specification:* Registered User Profile Management finished.
    - *Use-Case Specification:* Registered Users Block Post Interaction finished.
  - To-do tasks
    - Survey Google Authentication Mechanism.
    - *Back-End Implementation:* User Authentication through Google Authentication.
    - Refine Use Case Diagram based on group's feedback.
  - Issues/Obstacles
    - Implementation of Google Authentication (API workflow, …) is not yet clear.
    - Tools to create Use Case Diagrams have not been standardized among the group.
- Trần Thanh Long
  - Completed tasks
    - System service layout and Pages Navigation.
  - To-do tasks
    - Since the timing budget is limited, Long must prioritize Use Case Specification tasks.
    - *Use-Case Specification:* Registered User Block Posting Procedure
    - *Use-Case Specification:* Registered User Editing Block Post Procedure
  - Issues/Obstacles
    - Deadlines from other courses have to be taken first.
    - Database schematic not finalized.
- Trần Nguyễn Nhật Cường
  - Completed tasks
    - *Use-Case Diagram:* Direct Messaging finished.
    - Next.JS Experiment and Demo.
  - To-do tasks
    - Since timing constraint is on the line, Cường will prioritize finishing Use Case Specification tasks.
    - *Use-Case Specification:* Direct Messaging.
    - *Use-Case Specification:* Expert Users specialized functionalities.
    - *Use-Case Specification:* Administration User specialized functionalities.
  - Issues/Obstacles
    - Database schematic not finalized.
- Nguyễn Thế Thanh Long
  - Completed tasks

- - ■ *Use-Case Diagram:* Landing Page for Guest Users finished.
    - ■ *Use-Case Diagram:* Authentication System finished.
  - ○ To-do tasks
    - ■ *Use-Case Specification:* Landing Page for Guest Users.
    - ■ *Use-Case Specification:* Authentication System
  - ○ Issues/Obstacles
    - ■ Google Authentication mechanism is not well-understood, requiring further demonstration.
    - ■ Unclear task description, leadings to only Use Case Diagram being drawn and Use Case Specification not written.

Actions: The group has confirmed that tasks progress is at acceptable velocity. Actions are taken to clarify tasks description and help establish a standardized structure for Use Case Specifications. The group has also chosen PostgreSQL as the main Database Management System.

Summary of the meeting: tasks progress tracking has proven to be more successful since the last sprint due to the recent changes, though it is noticeable that tasks allocation is still delayed due to Project Manager's scheduling. The meeting has also concluded that due to timing constraints and the current progression, optional tasks are to be ignored temporarily and main focus should be on Use Case Specification tasks.
